ABSTRACT

This research was conducted to determine student learning outcomes through media images. Which aims to find out the concept of image media, the concept of learning outcomes, and know student learning outcomes by using image media from various experts. This research was motivated in the prior research by one of the experts that student learning outcomes were in the low category. This is caused by the factors of boring learning activities, learning activities are only one direction from the teacher to students, and the lack of student motivation in learning. This study uses a qualitative approach to the study method of literature study. The focus of the research being analyzed is analyzing student learning outcomes through media images from previous studies from various experts. The data collection technique used in this study is the documentation method by finding data in the form of documents from various sources such as books and journals, while the data analysis technique of this study uses deductive and inductive analysis. The results of the study that researchers found were related to student learning outcomes through image media from various experts showed student learning outcomes through image media experienced a significant increase in learning outcomes. The results of data analysis from various sources found that the concept of image media in the form of understanding the image media, the characteristics of the image media, the conditions for the use of image media, the advantages and disadvantages image media. The concept of student learning outcomes in the form of an understanding of student learning outcomes, factors that influence learning, types of assessment of learning outcomes, and indicators of learning outcomes. The use of image media in the learning process can significantly improve student learning outcomes. Thus, student learning outcomes through this image media can improve student learning outcomes.

Keywords: learning outcomes, image media
