

## **ABSTRACT**

*This study aims to determine: (i) how the interest in learning PKK (Creative Products and Entrepreneurship) class XII Catering students at SMK N 15 Bandung (ii) how the PKK Learning Outcomes (Creative Products and Entrepreneurship) class XII Catering at SMK N 15 Bandung (iii) how big is the influence of Learning Interest on Learning Outcomes of PKK (Creative Products and Entrepreneurship) class XII Catering SMK N 15 Bandung. The research method used was a survey, with a sample of 51 students. To find the effect, the data analysis used is simple linear regression analysis. The research results are as follows: (i) the students are very enthusiastic in following the lessons. Students agree that the assignment given by the teacher makes students more interested in PKK (Creative Products and Entrepreneurship) lessons. This is based on the results of data processing which show that the average score is 4.161 in the agree category. (ii) the average class XII Catering students read books before the lesson begins, students are also used to studying at home for about 2 to 3 hours at home. This is based on the results of data processing which show that the average score is at 3.66, which is in the agree category. (iii) the results of simple linear regression analysis show that there is an effect of interest in learning on student learning outcomes of class XII Catering at SMK N 15 Bandung. With an R<sup>2</sup> value of 0.002, it can be interpreted that interest in learning has a contribution of 0.2% to student learning outcomes. As the end of this study, the authors provide suggestions for students, with this research it is hoped that students can apply the efforts that can be made for student learning outcomes, by increasing interest in learning, especially in the subjects of Creative Products and Entrepreneurship so that the expected learning outcomes are achieved.*
