ABSTRACT

The purpose of this study was to (i) determine the peer environment of class X IPS 2 students at SMA Negeri 1 Rancaekek, (ii) determine the learning motivation of class X IPS 2 students at SMA Negeri 1 Rancaekek, (iii) determine the influence of peer environment on the learning motivation of class X IPS 2 SMA Negeri 1 Rancaekek. The method used in this research is a survey method with a quantitative approach. The data collection technique used was a questionnaire, and the data processing techniques used were normality test, simple linear regression test, hypothesis test, and determination test with the help of the SPSS 23 for windows program. Based on the results of data processing, it is obtained (i) the average result of the peer environment is 4.27 which has a very good influence, (ii) the average student learning motivation is 4.3 which means that the student has very good motivation. (iii) In the simple linear regression test, the t value is 3.081 with a significant level of 0.004, it can be concluded that the peer environment affects students' learning motivation. The amount of contribution given by the peer environment variable, namely R square of 0.223, means that the peer environment has an effect on learning motivation by 22.3% and the other 77.7% is influenced by external factors that are not examined. It can be concluded that the peer environment affects students' learning motivation. The suggestions of this research are (i) students are expected to be able to socialize with their peer environment which is expected to be a study partner for students, (ii) teachers are expected to provide advice to students so that they can mingle with their peers and provide encouragement. so that students have high motivation, and (iii) for future researchers, it is hoped that this research will serve as a reference for further research material.
