ABSTRACT

This study aims to find out: (i) How is the application of audiovisual learning media in economic subjects class X IPS SMAS YPKKP BANDUNG (ii) How are the results of class X IPS YPKKP BANDUNG students learning (iii) Is there an influence of audiovisual learning media oriented on student worksheets towards Class X social studies learning outcomes YPKKP BANDUNG. The research method used was a survey, with a sample of 22 students. To look for influence, the data analysis used is simple linear regression analysis. The results of the study are as follows: (i) The implementation and application of audio-visual learning media oriented to student worksheets in class X IPS has been done well. This is based on the results of data processing that shows the three items with the highest score, namely the sixth, eleventh and twelfth items. (ii) The learning outcomes of class X IPS students show good results. This can be seen from the comparison of the results of daily tests of students with the results of midterm tests of students who have increased even though there are still some people who are under mastery learning. (iii) The results of a simple linear regression analysis show that there is an influence of the audio-visual learning media oriented on students' worksheets on the learning outcomes of students of class X IPS BASUNG YPKKP in the academic year 2019/2020. With an R2 of 0.322, it can be interpreted that the audio-visual learning media oriented on student worksheets contributes 32.2% to student learning outcomes. As the end of this study, the authors provide advice to related parties namely: (i) For teachers, it is expected that learning using audio-visual media oriented on student worksheets can be used as an alternative in learning, because based on research that has been done there is an increase in learning outcomes students after carrying out learning using audio-visual media. (ii) For schools, it is expected to be a source of information, especially in improving student learning outcomes as input in an effort to improve the quality of learning through improving the learning process. (iii) For further researchers, it is expected to be able to apply learning using audio-visual media that is better oriented to student worksheets.
