**ABSTRACT**

*This study discusses the analysis of the elements of the point of view in the collection of short stories Time Party with Cinta by Intan Kirana, et al. This research is motivated by the lack of analysis regarding the elements of perspective in a literary work and the teaching materials used. Teachers only rely on text books and Student Worksheets (LKS), and students have not been able to understand the point of view of short stories, especially in grade IX SMP. Based on this, the authors are interested in conducting research with the title "Analysis of Perspective Elements in a Collection of Short Stories at Party Time with Cinta by Intan Kirana, et al. As an alternative for Class IX teaching materials for Indonesian Language Subjects. The purpose of this study was to determine what point of view elements are used in the collection of short stories Party Time with Cinta and its suitability with the 2013 curriculum used as an alternative teaching material for class X students. This study used qualitative methods with qualitative descriptive research design. The data source used is primary data from a collection of short stories with the title "Party Time with Love" and secondary data from journals, books, mass media, the internet which supports information about short stories. This research data collection technique using literature study techniques, documentation, and analysis. Based on the results of the research that the author has done, the writer concludes that the collection of short stories Time to Party with Love uses four elements of perspective. The point of view of the first charm of the main character is found in 13 short stories, the point of view of the first charm of the additional character there are three short stories, the point of view of the third charm is omniscient there is one short story, and the third charm point of view is limited to one short story. From the results of the analysis, the authors also found the appropriateness of the point of view elements in the collection of short stories Time Party with Cinta with the 2013 curriculum and can be used as teaching materials. The suitability between the point of view elements with the 2013 curriculum the writer made into teaching materials, then the teaching materials made were validated by two expert validators, and given a value from several aspects (1) aspects of content assessment, obtaining an average value of 82 (2) aspects of presentation assessment, obtaining an average score of 89 (3) aspects of language assessment, obtaining an average value of 83. And from the acquisition of this value, the teaching materials that the author has made are said to be in the "Good" category and are worthy of being used as teaching materials for class IX in accordance with the results of the assessment of two validators.*

**Keywords:** Elements of perspective, short stories, teaching materials.
