The Regio Journal Editorial Board has reviewed your article, the research topic is very interesting, but we decided that your article could not be accepted immediately. You must improve your article on several points.

I am sure you are willing to make this improvement because your scientific articles must meet Regio Journal standards.

Please correct your article according to the instructions from the Regio Journal Reviewers.

REVIEWER 1

The author can improve the abstract, especially from the aspect of the findings. In the introduction, the author needs to present appropriate reference notes.

Conceptual findings need to be clearly stated.

There is a considerable relationship with the normative literature. However, the authors are advised here to broaden the focus, using a more recent journal.

The research methodology section needs to be added with how the data is collected, because this will be transparent to the reader.

The conclusions are too short and do not clearly interpret the content of the study. Authors are advised to rewrite their conclusions.

There are theoretical implications presented. However, I would like to see the implications for practice and briefly in the abstract.

REVIEWER 2

Author must be show why this research is important or urgent to do in relation to the blankness of literature
Abstract is too long and wordy, the abstract must be concise and interesting that shows the problems, objectives, methods and novelty of the research results.

The author must map similar studies beforehand to show the novelty of this research

The discussion is not in depth, so deepen the discussion with the findings of previous researchers

References need to be added to the latest relevant journal articles in the last 5 years.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Best Regards,

Kepada: Lia M <lia.muliawaty@unpas.ac.id>

Dear

Dr. Lia Muliawaty. M.Si

Universitas Pasundan, Bandung

Based on Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

REVIEWER 1

Abstract must be made in a solid, consisting of all essential things related to the written topic, not repeating the conclusions of the research you have done.

The discussion section must be deepened, the author must relate the topics discussed with previous references. In this section the discussion is still weak because the references cited do not support it.

Conclusions should be concise and clearly explain the core findings of the study.

REVIEWER 2

The existing method does not describe in detail the research process carried out. The conclusions do not describe the overall results. The references must be current and in the form of a journal article. And, the author must explain what the limitations of this study are.

Articles that have been revised and please send it back via this email.

Best Regards,
