ABSTRACT

The purpose of this research aims to analyze or examine literature studies on the analysis of the development of teaching materials and LKS based on contextual teaching and learning in elementary schools. Data collection techniques used in this literature analysis research are editing, organizing, and finding. In addition to data collection techniques, there is data analysis in this library research, namely, deduction and interpretive. Teaching materials are materials, tools, or learning materials that have been systematically arranged and used by teachers and students in the learning process. Student Worksheets (LKS) are teaching materials in the form of sheets made by the teacher in accordance with the steps in accordance with the provisions that must be done by students containing practice questions. Meanwhile, contextual teaching and learning is a learning model used by teachers in the learning process that relates to the students' daily lives. In the steps of developing teaching materials and Student Worksheets (LKS) the teacher must not be careless in making teaching materials and Student Worksheets (LKS) must be in accordance with applicable regulations. The difficulty of teachers in collaborating learning models that are not appropriate with teaching materials in the form of worksheets used in the learning process. An effective learning model and in accordance with the development of teaching materials in the form of Student Worksheets (LKS), namely Contextual Teaching and Learning (CTL) because the teacher brings real-world situations into the classroom and encourages students to make connections between their knowledge. This can be seen by the many theories and previous research that support the analysis of the development of teaching materials and worksheets based on contextual teaching and learning in elementary schools.

Keywords: Teaching materials, Worksheets (LKS), Contextual Teaching and Learning (CTL)
