ABSTRACT

The purpose of this research is to find out: (i) how class management in economics class XI IPS SMAN 1 Lembang works. (ii) How is student learning motivation in economics class XI IPS SMAN 1 Lembang. (iii) How much influence class management has on learning motivation of students in economics class XI IPS SMAN 1 Lembang. The method used is a survey with a sample of 106 students from class XI IPS SMAN 1 Lembang. The data analysis used to find the effect was simple linear regression analysis with the average score calculated using the IBM SPSS statistics 24.0 for Windows program. The following are the results: (i) Economics class management in class XI IPS SMAN 1 Lembang shows good results. This is based on the results of data processing which shows an average score of 4,11 (82,17%) in the very good category (ii) students' learning motivation in economics subjects in class XI IPS SMAN 1 Lembang is 4,04 (80,87%) in the very good category. (iii) The results of simple linear regression indicate that there is a large influence of class management on students' learning motivation in economics subjects in class XI IPS SMAN 1 Lembang. (iii) Simple linear regression results show that class management has a significant impact on students' learning motivation in economics subjects in class XI IPS SMAN 1 Lembang. With an R Square value of 0,494. It can be interpreted that classroom management has a contribution of 49,4% to students' learning motivation. The researcher recommends the following to related parties: (i) for students, students should have a positive and focused attitude towards subjects, especially in economics so that students' learning motivation can increase through the influence of the internal and external environment. (ii) for teachers of economics subjects, it is better for teachers of economics subjects to innovate even more to create a good learning climate, which can increase students' learning motivation through applied learning strategies. (iii) for other researchers, Researchers who will conduct research in the same field should be more creative in carrying out activities.

Keywords: *Classroom management, student learning motivation.*
