

ABSTRACT

The title of the research conducted is the influence of online learning media Google Classroom on the learning independence of students. This study aims to determine (i) to determine the online learning media of google classroom on economics subjects in class X MIPA 2 SMA Pasundan 2 Bandung, (ii) to determine the learning independence of students in class X MIPA 2 SMA Pasundan 2 Bandung, and (iii)) to determine the magnitude of the influence of online learning media google classroom on the learning independence of students in class X MIPA 2 SMA Pasundan 2 Bandung. The number of samples in this study were 34 students and obtained data by means of interviews, document studies, and questionnaires. The research method used is the quantitative method. The results showed that the use of google classroom learning media in class X MIPA 2 SMA Pasundan 2 Bandung based on the interpretation criteria was very good, namely by obtaining an average questionnaire result of 4.20, the level of independence of students in class X MIPA 2 SMA Pasundan 2 Bandung. also based on the interpretation criteria it is very good by obtaining an average questionnaire result of 4.14, and after testing the hypothesis it shows that the value of t_{count} is $9.698 > t_{table} 0.3291$ with a significant level of 0.05, then H_a is accepted and H_o is rejected which means that The google classroom learning media variable has a significant effect on the learning independence of students, in addition to the coefficient of determination test, it shows that there is an influence of the google classroom learning media on the learning independence of students of 74.6%, which means that it has a very strong influence based on the interpretation criteria. The researcher suggests to relevant parties, namely: (i) for students it is expected to optimize the use of the google classroom learning media in the learning process so that it can continue to improve learning independence even better, (ii) for teachers it is expected to increase the professionalism and competence of teachers by optimizing the use of google classroom learning media and improving more effective and efficient teaching methods, (iii) for schools it is expected that schools will improve learning media facilities to support teaching teachers and expand telecommunications communication networks so that government quotas can be distributed in a timely manner and evenly distributed to every teacher and student as well as providing direction and support to teaching teachers, and (iv) for further researchers it is expected to explore and develop more deeply about the google classroom learning media and learning independence of participants students in the online and offline teaching and learning process at school.

Key words : learning media, google classroom, learning independence
