AN ABSTRACT

This study aims to determine: (i) how the effectiveness of learning using the face to face method in SMA Negeri 3 Ciamis (ii) how the effectiveness of learning using the online learning method at SMA Negeri 3 Ciamis (iii) knowing the effectiveness of learning between the use of the face to face method and online learning method for SMA Negeri 3 Ciamis. The research method used is a survey method with data collection techniques through the distribution of online questionnaires and paper questionnaires with a sample of 68 participants. The analysis used is a verification analysis of the data through the average score with the help of the SPSS Verson 25.0 For Windows program. The results showed a recapitulation of the average respondents' responses regarding: testing the effectiveness of learning using the face to face method 3.86 (77%) with the category "agree", (ii) the effectiveness of online learning learning 3.51 (70%) "agree". Based on the data analysis carried out, the results of the comparative study of the effectiveness of the face to face method and the online learning method at SMA Negeri 3 Ciamis were obtained. Based on the results of the Z test with a significance value of $0.000 < 0.05$, it is known that there is a difference between the face to face method and the online learning method. Thus H_0 is rejected and H_a is accepted. This proves that the face to face method is effective for Economics class XI IPS subjects at SMA Negeri Ciamis.

Keywords: *effectiveness, face to face method, online learning method*
