ABSTRACT

Education is a systematic, continuous and comprehensive learning process through teaching and training activities. Online learning during the Covid-19 pandemic makes lessons less effective. So with this we need learning media that can help the learning process to be effective. This study aims to determine how the influence of the use of online learning media through zoom and independent learning on student learning outcomes. The approach used in this research is descriptive quantitative approach with survey method. The research subjects of this study were students in class XI entrepreneurship majoring in OTPK (Office Automation and Governance) at SMK Pertiwi Sukamandi. While the object of research in this study is the use of online learning media zoom (X1), learning independence (X2) and learning outcomes (Y1). Data collection techniques in this study are observation, questionnaires and documentation. Data analysis techniques in this study there are 5 techniques, namely: 1) The design of the test instrument, the design of the test instrument is divided into 2, namely the validity test and the reliability test. 2) Descriptive analysis. 3) Classical assumption test, this test is divided into: normality test, multicollinearity test, heteroscedasticity test and coefficient of determination. 4) Multiple regression test. 5) Hypothesis testing, hypothesis testing is divided into 2, namely: simultaneous hypothesis testing (F test) and partial hypothesis testing (T test). The results of this study are that the use of learning media zoom meeting and learning independence affect the learning outcomes of Entrepreneurship students of class XI OTPK 1 and 2 SMK Pertiwi Sukamandi.

Keywords: *learning zoom meeting, independent learning, learning outcomes*
