ABSTRACT

This research is motivated by teacher management that has not been optimal or the lack of mastery of a teacher in doing a lesson well. So many teachers prefer to use the lecture method compared to other learning methods that are more interesting and certainly fun for students. Whereas with different learning methods will make the learning process more optimal in terms of activities and learning outcomes itself. The purpose of this study is to describe the concept of the Index Card Match learning method, the application of the Index Card Match method in learning, and the relationship of the Index Card Match learning method in improving student learning activities in elementary schools. The research method used is qualitative so that it will produce descriptive data in the form of written and spoken words. The type of research used is Literature Study with a series of activities related to library data collection by reading, exploring, observing, analyzing and processing research materials. Sources of data used are secondary and tertiary sources sourced from journals, books, reports, and other relevant sources. The data collection techniques used are editing, organizing, and finding. As well as data analysis used by researchers deductive and interpretive data analysis. Based on the results of the analysis, the index card match learning method is a method by using a card media during the learning process. By using this card, educators hope that it will be easier for students to learn the material in depth without having to memorize it constantly, and how to learn while playing will stimulate student activity. In the application of the index card match learning method,

there are steps that are systematically arranged so that they can increase student learning activities. Therefore, it can be concluded that the learning method using index card match can improve the learning activities of students in elementary schools.

Keywords: Index Card Match, learning activity
