**ABSTRACT**

This research is motivated by the learning process which is still teacher-centered using the lecture method and the teacher is still not creative in using learning media so that students are less active in the learning process and student learning outcomes are still below the KKM or Minimum Completeness Criteria. The purpose of this study is to describe the concept of using the Zoom Meeting Android Application, the process of using the Zoom Meeting Android application in learning, and its relation to the Zoom Meeting Android application in improving the learning outcomes of elementary school students. The research method used is qualitative so as to produce descriptive data in the form of written and spoken words. The type of research used is a library study with a series of activities related to data collection by reading, exploring, observing, studying, and processing research materials. Sources of data used are primary and secondary data sources sourced from journals, books, reports, and other relevant sources. Data collection techniques used are editing, organizing, and finding. As well as data analysis used by researchers to analyze deductive and interpretative data. Based on the results of the analysis, the use of the Android Zoom Meeting Application is a learning media that can help teachers and students carry out the learning process during the Covid-19 pandemic by using this media the learning process can create a learning atmosphere like in class. In the learning process, educators can involve students independently and make students actively involved in the learning process.
