ABSTRACT

This study aims to find the intrinsic and extrinsic elements contained in the novel "Negeri Di Ujung Tanduk" by Tere Liye by analyzing it and utilizing the results of the analysis to become one of the alternative teaching materials for class XII high school I. Descriptive research is research that describes the results of the analysis in a narrative manner. The data sources in this analysis are the novel "Negeri Di Ujung Tanduk" by Tere Liye and several books supporting the research. The results of the analysis of this novel include themes, characterizations, plot, setting, point of view, mandate, style of language, life history of personal authors, life of the community where the literary work was created, moral values, aesthetic and beauty values, social and cultural values, religious values, and political values. The total data recapitulation is 93 intrinsic element data and 71 extrinsic data. The results of this analysis are then adjusted to the demands of the curriculum, namely the Core Competencies and Basic Competencies, and teaching materials are made in the form of modules to support the learning of high school students in class XII.

Keywords: analysis, intrinsic elements, extrinsic elements, novels, teaching materials
