

**ANALISIS ALIH KODE DAN CAMPUR KODE *INTERN* DARI BAHASA
INDONESIA KE BAHASA SUNDA DALAM INTERAKSI PEMBELAJARAN
BAHASA INDONESIA SMP MUHAMMADIYAH 2 KADUNGORA GARUT**

ABSTRACT

The purpose of this research is to determine the form of code switching and intern code mixing as well as the causes of the phenomenon of code switching and code mixing in the interaction of Indonesian language learning at SMP Muhammadiyah 2 Kadungora. Beside that, the purpose of this research is also to prove theories regarding code switching and code mixing with condition in the field. This type of research is descriptive qualitative research. Researchers become instrument or research tool in qualitative research. The subject in this research are teacher and student at SMP Muhammadiyah 2 Kadungora. The data of this research is obtained by using the method of listening to the technique of recording and noting. Data collection is continued by analyzing the form and factors causing code switching and code mixing. The analysis method of this data is using *agih* and *padan* method. The presentation of data analysis in this research is the presentation of data analysis using words because this research is qualitative descriptive research. Based on the research of the analysis, the writer obtained data on code switching and intern code mixing with the total of 60 data. The writer found 35 data (58%) of code switching in the form of 27 sentences and 8 clauses. Then the writer also found 25 (41,2%) code-mixed data in the form of 20 words and 5 phrases. The factors causing code switching and code mixing that take place during learning have clear causes and functions.

Keywords: Code switching, code mixing, form, causative factors.
