

ABSTRACT

APPLICATION OF PODCAST MEDIA TO INCREASE THE ABILITY OF LISTENING TO FAI STORIES IN CLASS III STUDIES OF SDN TEGALWANGI

This research is motivated by the low ability to listen to fairy tales in third grade students of SDN Tegalwangi. The purpose of this research is to find out the improvement of listening ability of fairy tales using podcast media in third grade students of SDN Tegalwangi Kab. Bandung 2021/2022. From the results of initial observations that the researchers have done, it shows that the ability to listen to fairy tales in students is still low. Therefore, researchers are interested in conducting a study so that students' ability to listen to fairy tales using podcast media can increase. This study uses a quasi-experimental type of non-equivalent control group design. The population used in this study were all students of class III SDN Tegalwangi as many as 65 students. The sample of this study consisted of two groups, namely class III A as many as 22 students as the experimental class and class III B as many as 22 students as the control class. The treatment applied to the experimental group was the application of podcast media. The results of this study indicate that there is an increase in the test results of students' listening to fairy tales by 72% and when viewed from the average value there is an increase for the experimental class from 48.64 to 84.09 while the increase for the control class is 46% and if seen from the average value there is an increase from 31.36 to 53.18.
