

## **ABSTRACT**

*The title of this research is the application of Google Classroom Learning Media to Improve Student Learning Outcomes in Economics Subjects (Quasi Experiments for Class XII-IPS 1 Students at SMA Mekarwangi Lembang). -IPS 1 SMA Mekarwangi Lembang using the learning media google classroom (ii) To find out the description of the application of the Google Classroom application in Economics subjects related to student learning outcomes in class XII-IPS 1 (iii) To find out the improvement in learning outcomes for Economics subjects using the Google application classroom in class XII-IPS 1. The learning outcomes of students also occur at SMAS 1 Mekarwangi Lembang. Based on the results of the initial observations that the author did, it appears that most students are less enthusiastic in participating in online learning activities, low mastery of technology, limited facilities and infrastructure, internet network, costs, some students look less enthusiastic and even tend to be indifferent to learning materials. given by the teacher. In addition, students also look passive when the teacher asks questions, every time the teacher asks a question there are only a few students who look active and respond to questions given by the teacher by answering them in online learning media. So it is not surprising that when online learning activities take place, the teacher dominates. Furthermore, based on the type of online learning media in Indonesia currently many are used including books, audio, video, and others. The online learning media that will be discussed in this research is using Google classroom learning media..*
