***ABSTRACT***

The purpose of this research is to analyze factors affect the unemployment rate in Banten province. This research uses quantitative methods with secondary data and for data analysis is using differential regression. Show that partially the variables of Economic Growth (X1), Population (X2) and Workers in the Large Medium Industrial Sector (X4) have a significant influence on the open unemployment rate in the Regency/City in Banten Province (Y). Meanwhile, simultaneously, the variables of Economic Growth (X1), Population (X2), Regency/City Minimum Wage (X3) and Large Medium Industrial Sector Workers (X4) simultaneously have a significant effect on the open unemployment rate in Regencies/Cities in Banten Province. 2010-2020 years.

**Keywords** : Open Unemployment Rate, economic growth, population, Regency/City minimum wage, large-medium industrial sector workforce.
