ABSTRACT

Linguistics is studied at the linguistic level in which there are several branches of study on language such as sounds in language, word-forming units, structure in sentences, and meaning. One of the branches of linguistics that deals with meaning is Semantics. Meaning is a form of expression of speech by the speaker to the interlocutor with a specific purpose. One of the studies at the semantic level is the relation of meaning in which the study of synonymy, antonym, polysemy, homonymy, hyponymy and hypernymy, redundancy and ambiguity. Discussing the relation of meaning, it turns out that class X students still have difficulty understanding the relationship between meanings, especially in poetry. This study aims to provide a thorough understanding of the relation of meaning in poetry and to present innovative teaching materials regarding poetry material. Teaching materials are arranged in accordance with the demands of the 2013 curriculum. The research method used in this study is a qualitative type. The sources contained in this study are secondary data sources. The data collection techniques used are, documentation, and literature review. The results of this study, found 51 data containing the meaning relation of 21 selected poems. As for the data on the relation of the meaning of the word, namely ambiguity, there is 1 data; antonyms there are 23 data; hyponymy and hypernymy there are 3 data; homonymy there are 2 data; polysemy there are 10 data; there are 10 synonyms; there are 2 data redundancy. The results of this analysis are then used as teaching materials that can support the Indonesian language learning process at KD 3.17. Analyzing the elements of poetry building. The teaching materials compiled have been validated by expert judgment by obtaining an average score of 92 in the appropriate/good category so that it can be said that the teaching materials can be used in poetry learning.

Keywords: Analysis, teaching materials, poetry, meaning relation.
