ABSTRACT

Short story is a literary work in written form that tells about a fictional story and then packaged in a short, clear and concise manner. Short stories usually only tell a short story about the problems experienced by one character. This study aims to determine the psychology of readers in the collection of short stories "Atas Nama Derita" by Deny Januar Ali, which consists of 8 short stories and will be used as alternative teaching materials for students of class XI MIPA. This research is a qualitative descriptive using Sigmund Freud's psychological theory which focuses on the Id, Ego and Superego. The conclusions of this study are (1) The structure of the short story which consists of abstract, orientation, complication, evaluation, resolution and code. (2) the discussion of teaching materials that have been made by the author and assessed by the validator is suitable for use as teaching materials in short story learning.

Keywords: Short Story , Psychology of readers, Teaching materials.
