Dear  
Editor WEBOLOGY Journal

We have read and used scientific articles published in WEBOLOGY Journal.  
The performance of the WEBOLOGY Journal was excellent, and the published article helped us conduct research and write scientific articles.

I am Slamet Setiawan. Represent other authors from Universitas Pasundan, Bandung, Indonesia.  
We have completed a scientific article entitled "**Collaborative Governance Model of Drinking Water Supply and Services in Tangerang District: Study of Public Private Partnership (PPP) between Tangerang Regency Government and PT. AETRA Air Tangerang.**"

We hope this article can be published in the WEBOLOGY Journal because there are interesting findings in the scientific article that can become new treasures in science, especially in management sciences.  
We are willing to go through the review process following WEBOLOGY Journal standards.

Best Regards,

Slamet Setiawan  
Universitas Pasundan, Bandung, Indonesia

Dear

Slamet Setiawan, et. al  
Universitas Pasundan, Bandung, Indonesia

Thank you for submitting your team manuscript to WEBOLOGY.

We have completed our evaluation, and the reviewers recommend reconsidering your team manuscript following minor revisions. Please resubmit your team revised manuscript by November 20<sup>th</sup>, 2021, or ask whether an alternate date would be acceptable. We invite you to send back after addressing the comments below.

When revising your team manuscript, please consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be re-reviewed.

To submit your team revised manuscript, please log in as an author(s) at this email, and navigate to the "Revision" folder.

WEBOLOGY values your team contribution, and We look forward to receiving your team revised manuscript.

Editor and Reviewer comments:

Reviewer #1:

1. The abstract provides a clear overview of the study's objective and background. However, it would be beneficial to include specific research questions or hypotheses that the study aims to address. This would help readers understand the focus and purpose of the research more precisely.
2. While the abstract mentions the factors influencing the effectiveness of collaborative governance, it would be valuable to provide more specific examples or cases related to Tangerang Regency. This would enhance the readers' understanding of the local context and the challenges faced in the implementation of the Public-Private Partnership (PPP) for drinking water supply.
3. The abstract briefly mentions that the concept of collaborative governance was ineffective due to certain factors. To enhance the clarity and impact of the study, it would be helpful to elaborate on each of these factors, providing specific details and evidence to support the findings. This would strengthen the credibility of the research and its implications for future improvements.
4. The keywords provided are relevant and aligned with the study's content. However, it could be beneficial to include additional keywords related to the specific aspects investigated in the research. For example, "*network structure*," "*governance certainty*," or "*information sharing*." This would aid in attracting the attention of readers searching for studies on those particular topics.
5. The abstract briefly mentions the success of developing a collaborative governance simulation model. To enhance the practical implications of the study, it would be valuable to provide a summary of the key insights gained from the simulation and how they contribute to improving the effectiveness of the Public-Private Partnership (PPP) program in the provision and service of drinking water. This would highlight the significance of the research and its potential impact on real-world applications.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Slamet Setiawan, et. al  
Universitas Pasundan, Bandung, Indonesia

Thank you for your team's efforts to improve your team article. Based on the Reviewers' considerations, the article has, at some point, increased. However, your team has to improve on a few more points. Hopefully, your team is willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. While the abstract provides a comprehensive overview of the study, it would be beneficial to include a brief summary of the methodology employed. Mentioning the research design, data collection methods, and analytical techniques used would provide readers with a clearer understanding of how the study was conducted and strengthen the overall validity of the findings.
2. The abstract briefly mentions the limitations of the collaborative governance concept in the Public-Private Partnership (PPP) implementation for drinking water supply. To enhance the discussion, it would be valuable to propose potential solutions or recommendations to address these limitations. This would contribute to the practical implications of the study and offer insights for policymakers and practitioners seeking to improve the effectiveness of such partnerships.
3. It is commendable that the study utilizes the Collaborative Governance theory proposed by De'Seve (2007). To enhance the theoretical framework, consider providing a brief explanation of the key concepts and principles of this theory. This would help readers unfamiliar with the theory to better understand its relevance and how it informs the analysis of collaborative governance in the context of drinking water supply.
4. The abstract mentions the use of a descriptive study with a qualitative approach. It would be beneficial to provide a brief rationale for choosing this research approach and explain how it contributes to achieving the research objectives. Additionally, consider briefly discussing the sampling strategy or selection criteria used to ensure the study's findings are representative and applicable to the Tangerang Regency context.
5. The abstract concludes with the successful development of a collaborative governance simulation model. To further enhance the contribution of the study, consider mentioning the potential implications and applications of this model. Discuss how it can be used to inform policy decisions, improve stakeholder engagement, or enhance the overall efficiency and effectiveness of drinking water supply services. This would highlight the practical significance of the research and its potential impact beyond the study itself.

Articles that have been revised and please send them back via this email.
