Editor and Reviewer comments:

Reviewer #1:

1. The paper has some interesting information, and the topic is essential; however, there seem to be some basic questions suggesting flaws in the questionnaire, which put the conclusions in question.
2. The English in parts approaches is incomprehensible, so as a first step, a firm editorial hand would be needed to figure out what needs to be rethought.
3. The literature review refers to engaging experiences and studies elsewhere but is not well linked to the research and, therefore, the conclusions.
4. The paper's focus is more applicable to Indonesia Only. How about other countries and the questionnaire?
5. There should be more information about the object of research, not about the content of the study.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Iwan Satibi, et. al
Pasundan University Graduate Bandung, West Java Indonesia

Thank you for your efforts to improve your article. Based on the Reviewers' considerations, the article has, at some point, increased. However, the article has to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. I was hopeful that this article would be readily usable though the English in parts is so low that reading is challenging. The topic is of great importance.
2. The literature review includes some tantalizing references, but the links are not made to the specific study even after sorting through the language issues.
3. When study design comes into play, serious questions about the system arise.
4. It might be publishable if the author could work with a robust English language editor or colleague to clean up both language and argument.
5. A side note is that it's unclear what the title references the article.

Articles that have been revised and please send them back via this email.
