Dear
Editor Journal SFS

We have read and used scientific articles published in JSFS Journal.
The performance of the Journal SFS was excellent, and the published article helped us conduct research and write scientific reports.

I am Dadang. Represent other authors from IPDN Bandung Indonesia.
We have completed a scientific article entitled "***Village Fund Policy Implementation Strategy in Community Empowerment Based on Local Wisdom in Sumedang Regency.***"

We hope this article can be published in the Journal SFS because there are interesting findings in the scientific report that can become new treasures in sciences, especially in the field of social sciences.
I am willing to go through the review process following Journal SFS standards.

Best Regards,

Dadang Dadang
IPDN Bandung Indonesia

Dear

Dadang Dadang et al.
IPDN Bandung Indonesia

Thank you for submitting your manuscript to Journal SFS.

We have completed our evaluation, and the reviewers recommend reconsidering your team manuscript following minor revisions. We invite your team article to send back after addressing the comments below. Please resubmit your revised manuscript by March 11th, 2023 or ask whether an alternate date would be acceptable.

When revising your team manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be re-reviewed.

To submit your team revised manuscript, please log in as an author(s) at this email, and navigate to the "Revision" folder.

Journal SFS values your contribution, and I look forward to receiving your team revised manuscript.

Editor and Reviewer comments:

Reviewer #1:

1. The abstract provides a good overview of the research topic and problem. However, it would be beneficial to include some specific details about the methodology used in the study. Describing the data collection process and sample size would enhance the clarity of the research design.
2. While the abstract mentions the weak consistency of village development utilizing the village fund budget, it would be helpful to include some examples or statistics to support this statement. Providing specific instances or data points would strengthen the argument and make it more compelling.
3. The abstract highlights the elements that hinder the implementation of village fund policies, such as environmental factors and supervision. It would be valuable to elaborate on these factors and provide concrete examples of how they affect the implementation process. This additional information would give readers a better understanding of the challenges faced in Sumedang Regency.
4. The abstract mentions a diversification strategy as an ideal solution to overcome the identified problems. It would be beneficial to provide a brief explanation or examples of how this strategy could be implemented. Clarifying the steps or approaches involved in diversifying village fund policies would enhance the practicality of the proposed solution.
5. The abstract includes the keywords "Implementation," "Policy," and "Village Fund," which are relevant to the research. However, it would be helpful to add a few more specific keywords that accurately reflect the main focus of the study. Consider including terms related to community empowerment, local wisdom, or Sumedang Regency to ensure that the article is more discoverable to researchers in those areas.

I hope your team can make improvements as soon as possible and send the revised article again via this email.

Dear
Dadang Dadang, et al.
IPDN Bandung Indonesia

Thank you for your efforts to make improvements to your team article. Based on the Reviewers' considerations, the article has, at some point, increased. However, your team has to improve on a few more points. Hopefully, your team is willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. The research method used in this study is described as descriptive through case studies, which is appropriate for exploring the implementation of village fund policies. However, it would be valuable to provide some information on the selection criteria for the case studies. Clarifying why specific cases were chosen and how they represent the broader context of Sumedang Regency would enhance the study's credibility.
2. While the abstract highlights the elements that hinder the implementation of village fund policies, it would be beneficial to discuss potential strategies to address these challenges. Providing recommendations or suggestions for improving the environmental factors and supervision in village fund institutions would make the article more actionable for policymakers and practitioners.
3. The abstract briefly mentions the research analysis using interactive analysis models from Miles and Huberman. It would be helpful to provide a concise explanation of this model and how it was applied in the study. This would enable readers to understand the analytical framework used to interpret the data and findings.
4. The abstract states that the implementation of the Village Fund Policy in Sumedang Regency has not been effective. To strengthen this statement, consider including some specific examples or evidence of the negative outcomes or challenges faced in the implementation process. Providing concrete illustrations would make the argument more persuasive.
5. In the keywords section, consider adding a few more relevant terms to accurately reflect the content of the article. For example, terms like "*community participation*," "*local governance*," or "*sustainable development*" could help capture the multidimensional aspects of the research. This would enhance the visibility and discoverability of the article among researchers interested in those specific areas.

Articles that have been revised and please send them back via this email.
