

CHAPTER II

METHODS

This research is an empirical legal research with a socio-legal approach viewed from the perspective of legal consciousness and legal compliance.⁶ The type of research is sociological law (socio-legal), with data obtained from secondary sources through literature studies of various literature or library materials related to the research problem or material and observing the events that often occur in society.⁷ The data in this paper is analyzed using a qualitative method, which describes the results of the analysis obtained and provides a description or explanation of the research object as studied. The purpose of this writing is to review the perspective of sociology of law and analyze the triggers of vigilante action.
