**ABSTRACT**

*Images media is very helpful to improve student learning activities, because it involves all the students' potencies to achieve maximum learning. Some teachers in the State Elementary School at Telagasari have showed their best effort to maximize the use of images media, although some other teachers can not use the images media in their teaching as their school can not fulfill the media need. The purpose of this study is to know the influence of the images media toward the improving thematic learning activities in lower grades throughout the district Telagasari Karawang. The method of this study is quantitative research using the survey method. The technique used to collect data is observation and questionnaire. The collected data will be analyzed by inferential statistical technique using regression analysis. The result of this study indicates that coefficient of correlation of images media on student learning activities is equal to 0,44. While the coefficient of determination is equal to 44%. This means that images media have the significant influence toward increasing student learning activities in thematic learning. among the students of the in low classes of the state elementary schools of the state elementary schools at Telagasari Karawang.*
