

ABSTRACT

This research aims to determine the moderating role of conservative business strategy on the influence of independent commissioners on Corporate Performance in technology sector companies listed on the Indonesia Stock Exchange for the 2018-2022 period. This research uses quantitative research methods with a research sample of 11 technology sector companies listed on the Indonesia Stock Exchange for the 2018-2022 period. The sampling technique used is purposive sampling, namely sampling is carried out based on certain criteria. The type of data used is secondary data with data analysis using the Conditional Process Analysis method from Hayes with data processing assisted by SPSS and Marco Process from Hayes. The results of this research show that independent commissioners have a positive and significant influence on corporate performance. Conservative business strategy can moderate the influence of independent commissioners on Corporate Performance.

Keywords: independent commissioners, conservative business strategy, Corporate Performance
