ABSTRACT

This research is entitled "Analysis of the Value of Local Wisdom in the Short Story Selected by Kompas 2018 The Floating Prayer as an Alternative Teaching Material". This research is a type of qualitative research with a qualitative descriptive approach, because the aim of this research is to describe the values of local wisdom in the short story selected by Kompas 2018 Doa Terapung. The results of this data analysis will then be used as an alternative Indonesian language teaching material for students in class XI high school. The submission of this research was carried out on the basis that the short story as a literary work is a good teaching tool for fostering local wisdom values for students. The short story selected by Kompas 2018 Doa Terapung was chosen because it has a quality set of values and is relevant to the lives of students who are still teenagers. The results of this research obtained information regarding the values of local wisdom contained in 23 short stories. Of the 23 short stories, there are nine short stories that have the highest local wisdom values. The results of the analysis of local wisdom values in the short stories selected by Kompas 2018 as teaching materials are in accordance with the demands of the class XI SMA curriculum, because they contain KI, KD 3.8, namely analyzing life values in the collection of short stories read.

Keywords: Short stories, Value of local wisdom, short stories selected by Kompas 2018 Floating Prayers, teaching materials
