ABSTRACT

This study aims to determine; (i) to determine the learning interest of students in the subject of economics of class X students of SMA Pasundan 7 Bandung; (ii) to determine the learning motivation of students in the subject of economics of class X students of SMA Pasundan 7 Bandung; (iii) to determine the effect of learning interest on the learning motivation of students in the subject of economics of class X students of SMA Pasundan 7 Bandung. The research method applied is a survey method with a quantitative approach and data collection is carried out through questionnaires and interviews. The subjects that are the focus of the study are 132 class X students of SMA Pasundan 7 Bandung. The results of the study show that: (i) the learning interest of students is said to be good with an average score of 4.06 and a percentage of 80% which is included in the good category; (ii) the learning motivation of students is said to be very good with an average score of 4.11 and a percentage of 81% which is included in the very good category; (iii) simple linear regression can be obtained $F_{count} = 723,302$ with a significance of $0.000 < 0.05$, and $F_{table} = 22,503$. $F_{count} > F_{table}$, then the regression model can be used to predict the participation variable or in other words there is an influence of learning interest (X) and learning motivation (Y) on the economics subject of class X SMA Pasundan 7 Bandung. The results of the determination coefficient (R Square) are 0.849, which means that the influence of the independent variables (learning interest and learning motivation) is 84.9%, and the rest is influenced by other variables.

Keywords : *Learning interest, Learning motivation*
