

ABSTRAK

Penelitian ini bertujuan untuk menguji pengaruh keputusan investasi terhadap nilai perusahaan yang dimediasi *green innovation* dan dimoderasi *board gender diversity* pada perusahaan sektor *properti & real estate* selama periode 2021–2023. Penelitian ini menggunakan pendekatan kuantitatif dengan jumlah sampel sebanyak 14 perusahaan yang dipilih melalui teknik *purposive sampling* berdasarkan kriteria tertentu. Jenis data yang digunakan adalah data sekunder yang diperoleh dari laporan tahunan, dan teknik analisis data menggunakan *Conditional Process Analysis* model 59 dari Hayes dengan bantuan alat analisis SPSS dan *Macro Process*. Hasil penelitian menunjukkan bahwa keputusan investasi berpengaruh positif signifikan terhadap nilai perusahaan. Keputusan investasi tidak berpengaruh signifikan terhadap *green innovation*, dan *green innovation* juga tidak berpengaruh signifikan terhadap nilai perusahaan sehingga tidak memediasi hubungan keduanya. *Board gender diversity* terbukti memperkuat pengaruh langsung keputusan investasi terhadap nilai perusahaan pada tingkat keberadaan yang lebih tinggi dan sedang, meskipun uji interaksi formal tidak signifikan. *Board gender diversity* tidak berpengaruh signifikan dalam memoderasi hubungan keputusan investasi terhadap *green innovation* maupun *green innovation* terhadap nilai perusahaan, serta tidak memoderasi pengaruh tidak langsung keputusan investasi terhadap nilai perusahaan melalui *green innovation*.

Kata Kunci: Keputusan Investasi, Nilai Perusahaan, *Green Innovation* dan *Board Gender Diversity*

ABSTRACT

This study aims to examine the influence of investment decisions on the value of companies mediated by green innovation and gender diversity moderated by boards in companies in the property & real estate sector during the 2021–2023 period. This study uses a quantitative approach with a sample of 14 companies selected through purposive sampling techniques based on certain criteria. The type of data used is secondary data obtained from the annual report, and the data analysis technique uses Conditional Process Analysis model 59 from Hayes with the help of SPSS and Macro Process analysis tools. The results of the study show that investment decisions have a significant positive effect on the value of the company. Investment decisions do not have a significant effect on green innovation, and green innovation also does not have a significant effect on the company's value so it does not mediate the relationship between the two. Gender diversity boards have been shown to reinforce the direct influence of investment decisions on company value at higher and medium levels of existence, although formal interaction tests are not significant. Board gender diversity does not have a significant effect on moderating the relationship between investment decisions on green innovation and green innovation on company value, nor does it moderate the indirect influence of investment decisions on company value through green innovation.

Keywords: Investment Decision, Firm Value, Green Innovation, and Board Gender Diversity
